

# Armis Centrix: Comprehensive Cyber Exposure Management for OSHEAN Members

OSHEAN has partnered with Armis, the cyber exposure management and security company, to deliver enterprise-grade cyber exposure management to its member organizations.

Through this partnership, OSHEAN delivers Armis Centrix™, a seamless, AI-driven cyber exposure management platform that gives members comprehensive, real-time visibility and control across their entire environment, from the ground to the cloud.

## Complete Visibility Across IT, OT & IoT

OSHEAN members including higher education, government K-12, libraries, and community anchor institutions operate complex environments that extend far beyond traditional IT, including medical devices, research equipment, building systems, operational technology, and cloud workloads.

Armis Centrix™, delivered and supported through OSHEAN, provides:

- A single, authoritative inventory of all connected assets, known and unknown
- Real-time discovery across IT, OT, IoT, IoMT, cloud, and virtual environments
- Continuous monitoring using passive and active techniques without disrupting sensitive systems

Members gain continuous visibility into their asset inventory, associated risk, and remediation priorities.

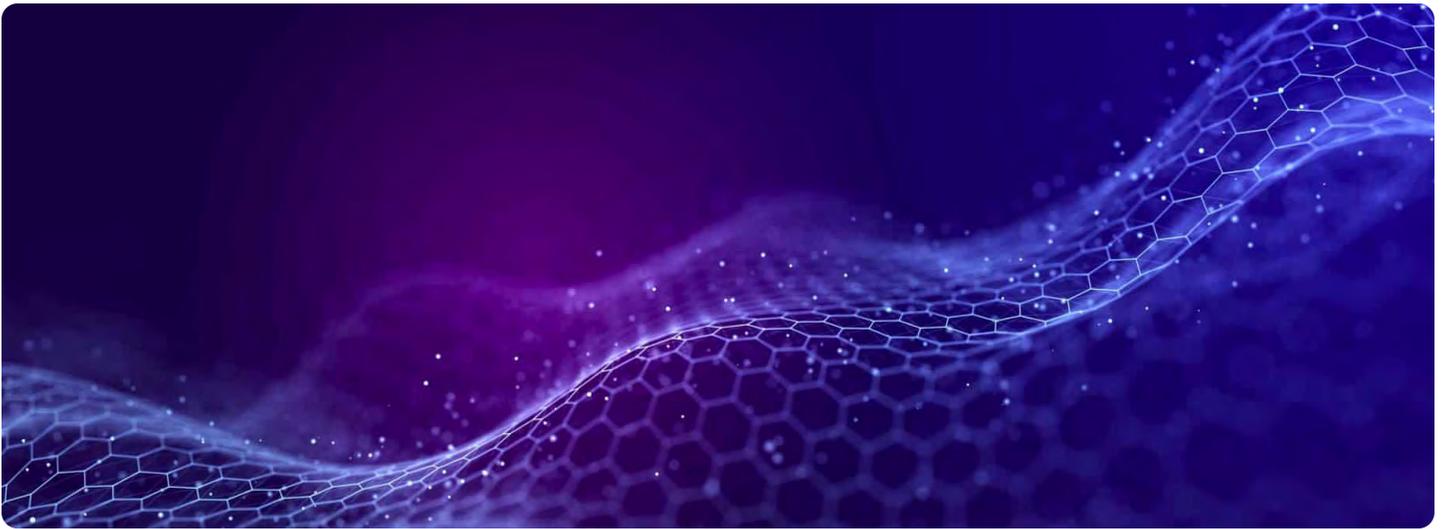

## From Asset Intelligence to Risk Reduction

Visibility is foundational, but action is what reduces risk. Armis Centrix™ delivers prioritized, intelligence-driven remediation that measurably improves detection and response performance.

Powered by the Armis AI-driven Asset Intelligence Engine, which monitors billions of assets globally, Armis Centrix™ transforms visibility into measurable security outcomes.

- Context-rich intelligence that prioritizes risk based on exploitability and business impact
- Consolidated, de-duplicated findings across existing security investments
- Automated remediation workflows and integration with SIEM, SOAR, and ticketing systems
- Reduced alert noise and faster time to resolution

OSHEAN helps members operationalize these insights within their existing security programs to strengthen resilience and improve overall risk posture.

## Designed for Critical, Resource-Constrained Environments

OSHEAN serves institutions where uptime, compliance, and operational resilience are essential. This joint solution supports:

- Healthcare, higher education, government, K-12, libraries, and community anchor institutions
- Medical and research devices that cannot tolerate intrusive agents
- Mixed IT/OT/IoT ecosystems
- Lean security teams managing expanding attack surfaces

Flexible deployment options including SaaS, on-premises, or hybrid ensure alignment with regulatory and operational requirements.

## Integrated Protection Through OSHEAN Managed Services

Through OSHEAN's managed services ecosystem — including Firewall-as-a-Service powered by Fortinet — members gain:

- Coordinated visibility across network and endpoint
- Automated threat containment
- Improved Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR)
- Predictable, scalable pricing designed for organizations of all sizes

This is enterprise-grade cyber exposure management delivered through a trusted, mission-aligned partner.

## Proactively Manage Cyber Risk with Confidence

As soon as your data is ingested into Armis Centrix™, insights are delivered in minutes. OSHEAN enables members to:

- See every asset.
- Protect what matters most.
- Continuously manage cyber exposure across the entire attack surface.

More than 40 Fortune 100 companies rely on Armis for continuous protection, and now OSHEAN members can access the same level of intelligence and resilience.
