## Let OSHEAN Manage Your DNS with NS1

NS1 provides industry-leading DNS performance backed by a 100% uptime SLA

DNS is mission critical for every enterprise. It directly impacts the availability, performance, and security of all websites and online applications. Traditional solutions ignore the massive changes in application delivery that have taken place over the past ten years. OSHEAN selected to partner with NS1 for its resilient, cloud-based, highly scalable architecture.

### MANAGED DNS BENEFITS:

- Industry-leading DNS response times
- 100% uptime SLA
- Redundancy with 25 Global POPS and 2 OSHEAN DNS servers
- Globally Anycasted Network
- DDoS protected
- Built-in monitoring and active failover (additional charges may apply)
- DNSSEC with full traffic management capabilities
- Secondary Zones
- HTTP Redirect
- Cisco Umbrella Integration
- API GUI
- 24x7x365 NOC support
- User accounts with access to portal to manage records
- Integration with OSHEAN's Member portal using single credential access

DNS is an opportunity to intelligently connect users and manage traffic across a complex and dynamic infrastructure. NS1 Managed DNS lowers IT overhead, enables more efficient use of infrastructure and delivers better application performance at your end user's device.

### Ready to take the next step with your DNS through NS1?

OSHEAN and NS1 are partnering to enable DNS benefits across OSHEAN membership. To start an NS1 assessment on your network, to see pricing, or to learn more about the solution, please send an email to [DNS@oshean.org](mailto:DNS@oshean.org).
